# Authorship and AI tools

The use of artificial intelligence (AI) tools such as ChatGPT or Large Language Models in research publications is expanding rapidly. COPE joins organisations, such as [WAME](#) and the [JAMA Network](#) among others, to state that AI tools cannot be listed as an author of a paper.

Authorship and contributorship

# COPE position

The use of artificial intelligence (AI) tools such as ChatGPT or Large Language Models in research publications is expanding rapidly. COPE joins organisations, such as [WAME](#) [↗](#) and the [JAMA Network](#) [↗](#) among others, to state that AI tools cannot be listed as an author of a paper.

AI tools cannot meet the requirements for authorship as they cannot take responsibility for the submitted work. As non-legal entities, they cannot assert the presence or absence of conflicts of interest nor manage copyright and license agreements.

Authors who use AI tools in the writing of a manuscript, production of images or graphical elements of the paper, or in the collection and analysis of data, must be transparent in disclosing in the Materials and Methods (or similar section) of the paper how the AI tool was used and which tool was used. Authors are fully responsible for the content of their manuscript, even those parts produced by an AI tool, and are thus liable for any breach of publication ethics.

Topic discussions  [Open to all](#)

### Managing conflicts of interest

Conflicts of interest (COIs) are highly relevant to the credibility of the published literature. This discussion considers COIs in both pre-

publication and post-publication stages.

## Discover COPE Focus

COPE Focus brings together our most important resources on a topic, providing up to date, carefully chosen collections.

### COPE Focus on artificial intelligence

The use of AI in the publication process is intended to increase the speed of decision making during the review process and reduce the burden on editors, reviewers, and authors. The adoption of AI raises key ethical issues around accountability, responsibility, and transparency.
